DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group 1, which includes claims 1-5, 10 and 14 in the reply filed on 2/15/06 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Gerzon, U. S. Patent No., 5555306.

Regarding claims 1 and claim 10, Gerzon discloses audio signal processor providing simulated source distance control. Gerzon's disclosure comprises the use of multiple input sources, which indicates at least two inputs; and one or more early reflection means (space processors) having an output with N directional components (col. 9, lines 27-34, col. 10, lines 10-27, col. 11, lines 23-col. 12, lines 1-11, col. 14, lines 33-44, and figures 6, 8-10), therein as claimed.

Regarding claims 2-5, Gerzon discloses everything claimed as applied above. Gerzon discloses the use of other distance simulation means implemented with the invention in col. 12,

Art Unit: 2615

lines 40-col. 13, lines 1-67 and col. 14, lines 1-11), which constitutes as a directional rendering unit, therein as claimed.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 14 is rejected under 35 U.S.C. 102(e) as being anticipated by Poletti, U. S. Patent No., 5862233.

Regarding claim 14, Polletti discloses a reverberation system. Polletti disclose at least two inputs, and at least two reverberation units, therein as claimed (Figure 2, col. 5, lines 30-67).

Response to Arguments

5. Applicant's arguments with respect to claims 1-5, 10 and 14 have been considered but are moot in view of the new ground(s) of rejection.

The applicant essentially argues that prior art of record fails to disclose the claimed invention as claimed in respect to the at least two inputs and at least two early reflection means and/or reverberation units. Two references of prior art have been used in the rejections of the elected claims, disclosing a plurality of inputs and a plurality early reflection units (space processors) and/or reverberation units, therein as claimed.
